SUMMARY

Aspiring Full-Stack, AI and Web3 Developer with practical experience in building AI-driven and web-based applications. Proficient in Python and JavaScript, with formal training in Python programming and a strong foundation in machine learning and backend systems. Passionate about developing scalable solutions for real-world challenges

EXPERIENCE

AI Intern | ZEAI SOFT | Chennai (REMOTE) | Jan 2025 – Jan 2025

- Gained hands-on experience in frontend development by working with real project modules, improving UI design, debugging, and implementing responsive layouts.
- Learned industry-standard software workflows including version control, teamwork collaboration, problem-solving approaches, and writing clean, maintainable code.

Blockchain Developer Intern | CODTECH IT SOLUTIONS | Hyderabad (REMOTE) | Jun 2025 – July 2025

- Learned the fundamentals of blockchain technology, including smart contracts, decentralized applications (DApps), and Web3 development workflows.
- Gained practical exposure to real-world blockchain applications, improving problem-solving skills and understanding of decentralized system architectures.

EDUCATION

R P Sarathy Institute of Technology | 2024-2028

B. Tech – Artificial Intelligence and Data Science – Currently CGPA: 8.01

Bharathi vidyalaya Higher secondary school | 2022 – 2024

- HSLC - Percentage – 66 %

SKILLS

Programming Languages : Python, JavaScript, HTML, CSS

AI and Machine Learning : Machine Learning Basics, Model Building, Data Processing

Web Development : Full-Stack Development, REST APIs, Responsive UI Design

Blockchain : Solidity, Smart Contracts (Basics)

Databases : SQL, MongoDB (Basic)

Tools : Git, GitHub, VS Code, Jupyter Notebook

Core Concepts : Data Structures and Algorithms, Object-Oriented Programming, Problem Solving

PROJECTS

Agro-Sense AI – Smart Agriculture Assistant : Python (Flask), Machine Learning, JavaScript

- Built an AI-based system for crop recommendation, fertilizer planning, and disease detection using soil, weather, and image inputs
- Integrated ML model, soil health scoring, authentication, and reporting features into a single web platform

Crypto Price Tracker : Flask, JavaScript, CoinGecko API

- Developed a real-time web application to track top cryptocurrencies using API integration with live price updates
- Implemented search functionality, dynamic UI updates, and backend optimization for smooth performance
